WEB DEVELOPMENT AND DESIGN

I am an Entry-level IT professional with a strong academic background seeking a position as a Web Developer and Designer.

- A quick and adept learner with a strong working knowledge of web design & development, database administration, programming, and networking
- Committed to developing elegant user interfaces that raise the bar for utility and design. Please see my personal webpage at http://mattboddy.github.io/.
- Outstanding written communication skills. I am actively engaged in creative writing for personal projects. I also served as Municipal Liason for National Novel Writing Month, also known as NaNoWriMo, the annual, internet-based novel writing program.
- A strong desire to learn new tools and techniques
- Function well independently or with a team
