Professional Summary

Ever since I was old enough to use a word processor I have thrived on writing and that passion has powered my success in school and in work. For the past three years, I have been working as a web developer and have greatly enjoyed the creative outlet that allows for writing and design. Going forward, I would like to pursue a junior position as a technical writer that utilizes my writing, design, and technology skills.

Core Strengths

- Visual thinker
- Technical and analytical
- Natural bent for creativity

- Task and process driven
- Effective on a team or independent
- Strong work ethic, integrity driven, and reliable

Technology Snapshot: HTML, CSS, PHP, Javascript, Python, Ajax, ASP, Java, C#, C++, Wordpress, Squarespace, GIMP, MySql

Professional

Writing

- Wrote several professional websites as a contractor for LitmusBox LLC in several mediums on as many subjects, clients were very happy and went on to use the materials successfully
- Wrote several process flow documents at LitmusBox LLC to train clients' employees to use produced materials for support after the commission, which drew appreciation and high reviews
- Assisted a team of about ten writers as a municipal liaison for National Novel Writing Month, provided assistance as editor, proofreader, artist, and technical support

Design

- Designed several professional websites as a fullstack developer at LitmusBox LLC, paying especial attention to user experience and interface while providing an aesthetic that pleased the clients
- Programmed and implemented programs and algorithms in an aesthetically pleasing way that exceeded clients' expectations
- Researched and self-taught Android Studio, drawing on a wide variety of formal and informal sources, and learned to make aesthetically pleasing mobile apps within a week

Technology

- Programmed a text-based adventure game from the dirt up using C# and researched a wide variety of subjects, including history, religion, and marine biology to create an immersive experience
- Programmed a wide variety of websites, apps, and algorithms as a fullstack web developer at LitmusBox LLC, using several different disciplines while learning new disciplines, languages, and methodologies, ultimately creating products that pleased the clients
- Programmed a senior capstone project that demonstrated mastery of a wide variety of web development disciplines, including HTML, PHP, CSS, MySql, and Javascript that earned an A+
